

ReFilaMe Recycling Program

How It Works:

You mail us your leftover spools and discarded printed materials and we pay you!

Email LHayes@refilame.com with the type and weight of the items you will be sending, along with your shipping information. From there, you will receive a UPS label to attach to your package. After receiving your recyclables, we will verify the weight and you will be sent a receipt with your ReFilaMe online store credit.

Note: *It is imperative that you correctly label and sort the type of plastic (ABS or PLA) of your recyclables. Failure to do so will result in a reduction of credit.*

How much ReFilaMe Credit will I receive?

Pounds of Recycled ABS ReFilaMe Credit per pound	Pounds of Recycled PLA ReFilaMe Credit per pound	Number of Spools ReFilaMe Credit per Spool
1-4 lbs \$3.50	1-4 lbs \$3.75	1-4 spools \$0.50
5-10 lbs \$3.75	5-10 lbs \$4.00	5-10 spools \$0.75
10+ lbs \$4.25	10+ lbs \$4.50	10+ spools \$1.00

What Happens to My Filament?

Your discarded filament will be processed and reconverted back into printable filament and will be sent back to you in a timely manner! You will receive ReFilaMe Credit based on the volume of material you recycle which you can apply to your next order of filament.

What's the benefit for our company?

With a strong partnership we make a commitment to sustainability within the 3D printing community. Not only will you see cost saving over time in your filament purchases, you will also be giving the 3D printing industry reach new levels.
